**Overview Emergency Medical Equipment**

- BASIC First Aid Kit
- Single Aisle First Aid Kit
- Long Range First Aid Kit
- EASA AIR-OPS Emergency Medical Kit
- FAA Emergency Medical Kit
- Universal Precaution Kit (Standard or Long Range version)
- Attendant Kit
  
- In case of other needed requirements Innovint can provide a compliance analysis.

The medical equipment is defined by the FAR, EASA and ICAO requirements.

The requirements prescribe the minimum mandatory standard. It is always the airline decision to select advanced configurations regarding contents in order to provide cabin crew and voluntary physicians with a wider range of equipment, thus saving many lives in an emergency medical situation. Innovint kits are based on a modular system and comprise mandatory basic kits as well as advanced and customized configurations.

PNR 6240-series • First Aid Kit stored in bracket

**EASA AIR-OPS REQUIREMENTS**

First Aid Kit	EASA AIR-OPS	
1-99	pax	1 ea.
100-199	pax	2 ea.
200-299	pax	3 ea.
300 up	pax	4 ea.

**Emergency Med. Kit EASA AIR-OPS**

Required for more than 30 pax. if any point on the planned route is more than 60 minutes flying time from an airport at which qualified medical assistance is assured.

PNR 6240-series • Emergency Medical Kit

**FAR-121 Subpart X**

First Aid Kit	FAR-121	
50	pax	1 ea.
51-150	pax	2 ea.
151-250	pax	3 ea.
250 up	pax	4 ea.

**Emergency Med. Kit FAR-121**

One approved emergency medical kit in aircraft for which a flight attendant is required.

**BASIC First Aid Kit**

- Airbus cross fleet approval
- Boeing basic approval
- ETSO Approval under technical specification TS 40.400/2TS
  
- In compliance with EASA AIR-OPS
- In compliance with FAR-121, subpart X
- In compliance with ICAO, part I

Anticipated shelf life is 18 months, which may be reduced down to 12 months due to the availability of medicine production lots. Latches can be sealed by tie-wraps, plombs or lockers.

The first aid kit PNR 6240-37 has been strictly assembled to the statutory requirements of EASA AIR-OPS. In addition the kits cover FAR 121, subpart X and ICAO, part I as well. It represents the classical standard equipment. The contents of first aid kit PNR 6240-48 is reduced for FAR-121 requirements only. The kits are manufactured of aluminum sheets (coated in grey) and aluminum sections.

The bracket PNR 6240-01-001 allows installation of the kit at any location. The bracket has been tested in our approved testing facilities for use in all directions (9g).

Single Aisle First Aid Kit

- Airbus cross fleet approval
- Boeing basic approval
- ETSO Approval under technical specification TS 40.400/2TS
  
- In compliance with EASA AIR-OPS
- In compliance with FAR-121, subpart X
- In compliance with ICAO, part I
- Content exceeds named regulations

Anticipated shelf life is 18 months, which may be reduced down to 12 months due to the availability of medicine production lots. Latches can be sealed by tie-wraps, plombs or lockers.

PNR 6240-35 • First Aid Kit standard body

PNR 6240-45 • White powder – coated

PNR 6240-05-001 • Bracket

These First Aid Kits have been assembled to the statutory requirements of EASA AIR-OPS. In addition the kits cover FAR 121, subpart X and ICAO, part I as well. They are especially designed to be stored in the overhead stowage compartment, taking as little space as possible. PNR 6240-35/-65 is manufactured of aluminum sheets (coated in grey) and aluminum sections.

PNR 6240-45/-46 is made of a more light weight box (coated in white).

The bracket PNR 6240-05-001 allows installation of the kit at any location. It has been tested in our approved testing facilities for use in all directions (9g).

Long Range First Aid Kit

- Airbus cross fleet approval
- Boeing basic approval
- ETSO Approval under technical specification TS 40.400/2TS
  
- In compliance with EASA AIR-OPS
- In compliance with FAR-121, subpart X
- In compliance with ICAO, part I
- Content exceeds named regulations

Anticipated shelf life is 18 months, which may be reduced down to 12 months due to the availability of medicine production lots. Latches can be sealed by tie-wraps, plombs or lockers.

PNR 6240-31 long range first aid kit gives high degree of flexibility for contents customization. Half of the size is required to comply with the EASA AIR-OPS, FAR-121 requirements and ICAO. The other half can be equipped to the airliner needs. The -xx PNR will change accordingly (PNR 6240-31 shown). The kit is manufactured of aluminum sheets (coated in grey) and aluminum sections.

PNR 6240-41 is made of a more light weight box (coated in white).

The bracket PNR 6240-01-001 allows installation of the kits at any location. The bracket has been tested in our approved testing facilities for use in all directions (9g).

FAA Emergency Medical Kit

- Airbus cross fleet approval
- ETSO Approval under technical specification TS 40.400/2TS
- In compliance with FAR-121 Subpart X
- In compliance with ICAO, Part I

The Emergency Medical Kit PNR 6240-28 has been assembled strictly to the statutory requirements of FAR 121, Subpart X and ICAO, Part I including latest amendment. The emergency medical kit represents the minimum mandatory standard. The upper compartment is equipped with an ampoule rack which holds up to 33 ampoules. The lower compartment is divided into sections grouping the items by medical subject. The kit is manufactured of aluminum sheets (coated in grey) and aluminum sections.

Anticipated shelf life is 12 months, which may be reduced down to 9 months due to the availability of medicine production lots. Latches can be sealed by tie-wraps, plombs or lockers.

The bracket PNR 6240-01-001 allows installation of the kit at any location. The bracket has been tested in our approved testing facilities for use in all directions (9g).

**Attendant Kit**

The attendant kit PNR 6240-81 provides for the cabin crew the "all flight" necessary first aid sundry items.

The certified first aid kit does not need to be used, which avoids the removal of the first aid kit from the aircraft and mandatory part inspection.

The soft pocket is made of red Nylon with a zipper. The below listed contents may be extended by some standard medicine, e.g. such as remedy for wounds, nasal decongestant, or loperamide.

PNR 6240-81 /-82 • Attendant Kit

**DIMENSIONS**

Attendant Kit	PNR 6240-81	
Length:	160 mm	6.30 in
Width:	40 mm	1.60 in
Height:	110 mm	4.33 in
Weight max: (incl. contents)	0,15 kg	0.33 lbs

**LIST OF CONTENTS**

Attendant Kit	PNR 6240-81	
1 EA Adhesive bandage	6 x 10 cm.	8 ea.
2 EA Elastic bandage	8 cm x 4m	
2 EA Gauze compress	7,5 x 7,5 cm,	2 ea
1 EA Disposable gloves pair, large		
1 EA Triangular bandage		
1 EA Scissors, bandage		
1 EA Antiseptic alcohol swabs		10 ea

Contents may be extended according to customer requirements, nevertheless space is limited.

**DIMENSIONS**

Attendant Kit	PNR 6240-82

- Various possibilities to reliably fix unruly passengers depending on situation
- Includes also means to release fixated persons quickly.

**Restraint Kit Standard**

*Innovint's Restraint Kit includes all necessary equipment to reliably fixate unruly passengers onboard aircraft.*

*Various possibilities are given enabling the cabin crew to react adequately: Fixating a passenger on a seat can be done with the heavy duty duct tape or alternatively with the heavy quality chest and leg fixation belts. Passengers lying on their fronts can be bound either with single use foot shackles and handcuffs or with strong metal handcuffs. To be able to release fixated persons quickly a belt cutter and scissors are included as well.*

Universal Precaution Kit

Universal Precaution Kits PNR 6240-10X are required on board according to ICAO standard Annex 6 Operation of Aircraft. Innovint adopted the UPKs to its medical emergency equipment product line and offers three different configurations.

The standard UPK is available in a soft robust canvas bag out of the „InnoBag product-line“. This allows an easy stowage throughout the cabin, contributes to a real weight reduction, and fits into an ATLAS standard drawer. Alternatively it can fit in our standard aluminum kit with matching bracket for installation.

The PNR 6240-10 is the „Long Range“ version and takes, regarding the quantity configuration of the contents, the larger number of crew members into account. Also for the UPK long range version matching installation brackets are available. On top of the ICAO Standard we offer customized versions, either taking customer requirements into account, or adapt to national regulations regarding the content of the UPK.

Anticipated shelf life is 18 months, which may be reduced down to 15 months due to the availability of medicine production lots.

Description	Instructions for use
<b>Face Mask</b>	High filtration performance, extremely high absorptive capacity, 95% glass fibre free.
<b>Eye Mask</b>	Eye protection glasses to prevent from chemical and mechanical impacts.
<b>Disposable Gloves</b>	Nitril is an artificial rubber material with excellent resistancy against a large number of resolvents and chemicals, as well as oils, fats and acids.
<b>Protection Apron</b>	Perfect protection against impureness, made of flexible polyethylene.
<b>Germicidal Desinfectant</b>	Ready-to-use cloths for quick disinfection of surfaces. Medical application: bacteria, fungi and virus to a limited extent.
<b>Skin Wipes</b>	Reliably acting against vegetative bacteria, mycobacteria, fungi and virus to a limited extent.
<b>Dry Powder</b>	Highly absorbent inodorous and dust-free granulated material on mineral basis dedicated to absorb liquids.
<b>Large Absorbent Towel</b>	Cloth to absorb liquids, i.e. blood, secretion or urine, made of cellulose flakes with textile fleece sealing. The bottom side consists of a liquid proof polyethylene foil.
<b>Pick Up Scoop</b>	Hand shovel according to HACCP (Hazard Analysis and Critical Control Points-conception). Temperature resistant up to 100°C.
<b>Scraper</b>	Spatula acc. to HACCP (Hazard Analysis and Critical Control Points-conception). Temperature resistant up to 100°C.
<b>Scraper With Brush</b>	Brush acc. to HACCP (Hazard Analysis and Critical Control Points-conception). Temperature resistant up to 100°C.
<b>Biohazard Waste Bag</b>	Biohazard-waste bag, 760mm x 160mm, PE, with Biohazard symbol.
