Seat Blocker

- Easy handling in installation and removal
- One-fits-all
- Clear „NO SEAT“ indication
- Flame retardant

In accordance with:

- EASA-CS/FAR 25.853 (a) App. F PT. (a) (1) (iv)
(for seat belt solution)
- EASA-CS/FAR 25.853 (a) App. F PT. (a) (1) (ii)
(for sleeve solution)

Two kinds of seat blockers are available:
First solution consists of a separate passenger seat belt with stitched indication „NO SEAT“, which is simply installed over the arm rest and both ends are tied up under the seat by means of cable ties.

Second solution is a sleeve made from black fabric with stitched indication „NO SEAT“, pulled over the existing passenger seat belt.

Both seat blockers have high-quality appearance and are made of fire retardant and very robust materials. The installation/removal is very quick due to its simple strap-on design, and can be adjusted to any width between the armrests.

PNR 2521-021 • separate passenger seat belt

PNR 2521-016 • sleeve for existing seat belt
